

WHAT IS CLAIMED IS:

1. A zipper tape for a bag produced by forming a base tape and a mating section comprising a male strip and a female strip separately by extrusion molding and then thermally fusing and bonding the mating section to the base tape, wherein letters, marks, colors or the like are printed or provided in the material of one of the base tape and or one of the zipper tape.
2. A zipper tape for a bag produced according to claim 1, wherein a specific color is provided to the base tape of this zipper tape.
3. A zipper tape for a bag according to claim 2, wherein different colors are used for the male strip and female strip on the base tape.
4. A zipper tape for a bag produced according to claim 1, wherein colors are given to the male strip and the female strip forming together a mating section of the zipper tape.
5. A zipper tape for a bag according to claim 4, wherein different colors are used for the male strip and the females strip respectively.
